### INQUIRIES

- *for further information about statistics in this publication and the availability of related unpublished statistics, please contact Information Services on Melbourne (03) 9615 7755 or any ABS State office.*
- *for information about other ABS statistics and services, please refer to the back page of this publication.*

## NOTES

### ABOUT THIS PUBLICATION

The aim of this publication is to provide users with a range of the latest statistics available at the end of each month of issue. Consequently the dates and periods shown are not always the same for each table, but are in each case the latest figures available at that time.

### CHANGES IN THIS ISSUE

'Economic Indicators, Victoria in Relation to Other States and Territories' and 'Economic Indicators, Victoria and Australia' formerly Tables 1 and 2 in previous issues of this publication have been removed because user reviews of similar tables in related publications have indicated that the tables were not used to any extent. Analysis based on comparing one period with the last period and with the same period from the previous year can be misleading unless set in context.

### SEASONAL ADJUSTMENT

Seasonal adjustment is a means of removing the estimated effects of normal seasonal variations from economic time series so the the effects of other influences are obvious. Seasonal variations are the systematic (though not necessarily regular) intra-year movements of economic time series. These are often the result of non-economic phenomena, such as climatic changes, and regular religious festivals e.g. Christmas and Easter.

### TREND ESTIMATE

Smoothing seasonally adjusted series produces a measure of trend by removing the impact of the irregular component of the series. The trend estimates are derived by applying a 13-term Henderson weighted moving average to the respective seasonally adjusted series. Readers are reminded that trend estimates are subject to revision as subsequent months' data become available.

### SYMBOLS AND OTHER USAGES

n.a. not available  
n.p. not available for publication  
p preliminary  
r figure or series revised since previous issue  
.. not applicable  
— nil or rounded down to zero

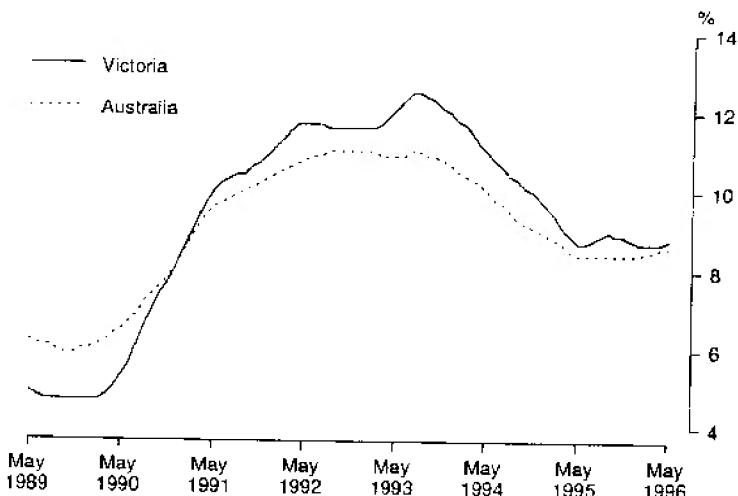

## SELECTED FEATURES

### UNEMPLOYMENT RATE

The trend estimate of the unemployment rate for Victoria in May 1996 (8.8%) showed a slight increase from the rate in April 1996 and May 1995 (both 8.7%).

For Australia, the trend estimate of the unemployment rate in May 1996 stayed at the same rate as in April 1996 (8.6%) and increased slightly from May 1995 (8.4%).

### UNEMPLOYMENT RATE Trend, monthly

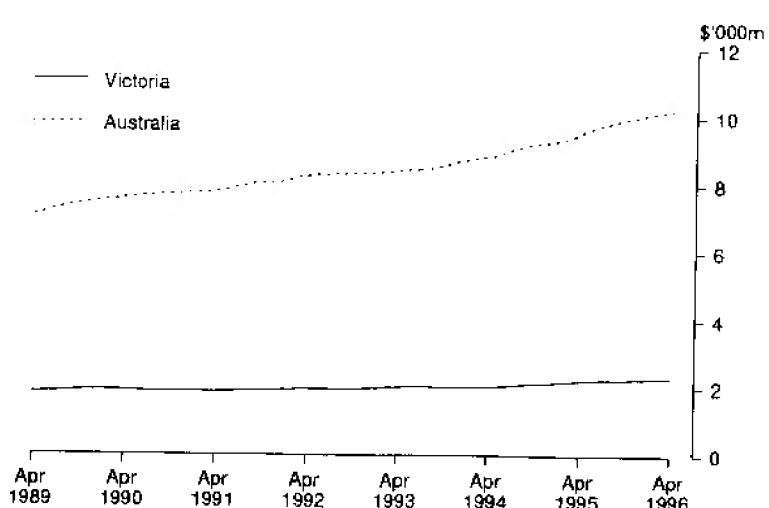

### RETAIL TURNOVER

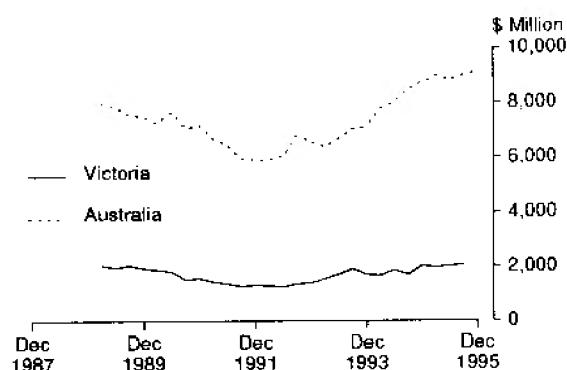

The trend estimate of retail turnover for Victoria in April 1996 was \$2,319.4 million, an increase of 0.4% from March 1996 (\$2,310.5 million), and an increase of 4.7% from April 1995 (\$2,215.8 million).

For Australia, the trend estimate of retail turnover in April 1996 was \$10,212.2 million, an increase of 0.2% from March 1996 (\$10,187.2 million), and an increase of 7.0% from April 1995 (\$9,548.1 million).

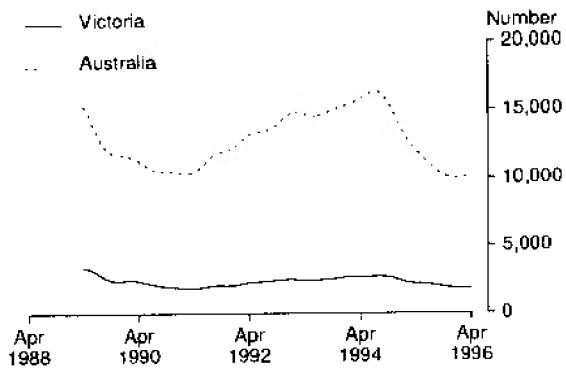

### RETAIL TURNOVER Trend, monthly
